

Improvements closes gap from previous year

The team was back in action at Knutstorp for the *Svenskt Sportvagnsmeeting*. Friday was spent running in the engine and testing prior to Saturdays qualifying and first race. "The new engine felt strong and sounded great – said driver Anders"

Qualifying on Saturday in hot dry conditions were not ideal for the Healey on the tight circuit, as they tyres tended to overheat, but despite this, Anders qualified the Healey third just behind more sophisticated cars ... an E-type Jaguar and Lotus Elan 26R.

Race 1

Chasing the leading Lotus ...whilst keeping the door closed on the Jaguar behind!

Anders made a great start getting into second by the first corner, ahead of the E-type Jaguar. "I made contact with the leading Lotus and had to watch my mirrors for the hard charging Jaguar which was gaining 50-70m on the straight." commented driver Anders after the race.

Eventfull Race 1

Healey showing the scars of battle after a race full of close action!

Jaguar E-type with tyre marks from the Healey.

A race long battle between the Healey and the E-type Jaguar kept the crowds entertained with very close racing action ... resulting in some unfortunate body contact.

”On the eighth lap, I made a last ditch attempt to defend my second place ... the tyres and brakes were very hot and I drifted wide getting off line dropping down to fifth at the chequered flag. It was still a good result at this circuit in the weather conditions.”

Bad Start ... Better Finish in Race 2

The Healey bogged down at the start dropping from third to seventh, but a spirited drive from Anders saw the Healey cross the line in fourth at the flag behind the winning E-type Jaguar and two Lotus Elans. An excellent result after the terrible start said team member Erik Lindberg-Rydåker.

*Anders losing some "ballast" in Race 1
having visited the gravel trap!*

*Danish driver Roar Eriksen had
a great weekend in his recently
acquired Healey 3000 finishing
second Healey in both races ...
Congratulations!*
